

MRK HOTELS

Update 4 — Your Own Laundry Price List

v1.1.0 · Edition 1.0 · 15 August 2026

Understanding the Update · 4 — Laundry: Your Own Price List

For the management and staff of MRK Hotels — 5 September 2026

1. What was the problem?

Laundry items were typed in **by hand with the price entered manually every time**. There was no official price list in the system.

What that meant for you:

- The same item could be charged different prices on different days or by different staff.
- Guests could be over- or under-charged without anyone noticing.
- The hotel had no clear record of what it launders and at what price.

2. What did we change?

- Your hotel now has its own **Cloth Types price list** in the Laundry section.
- For each cloth type (e.g. *Bed sheet*, *Towel*, *Table cloth*) you set up to three prices:
 - **Wash price**
 - **Iron price**
 - **Dry-clean price**
- When a new laundry order is entered, your attendant **picks the cloth type from the list** and the system **fills in the correct price automatically** for the service chosen.
- Changing the service (wash → iron → dry-clean) **re-prices the order automatically**.
- Prices are protected: staff cannot accidentally type a different price for a listed item.

3. Why it matters to you

- **Consistent prices.** Every guest pays the same price for the same item — every time.
- **Easy to manage.** You can add, change or disable cloth types at any time from the Laundry page — no developer needed.
- **Better reports.** Consistent item names mean laundry reports make sense.

4. What you need to do (once)

To enable this, add your cloth types once:

1. Go to **Laundry → Cloth Types**.
2. Click **Add**, enter the item name and its wash / iron / dry-clean prices, and save.

3. Repeat for each cloth type you offer.

Until you add any, your staff can keep entering items by hand **exactly as before** — nothing is blocked.

5. Summary

Question	Answer
Where is the price list?	Laundry → Cloth Types
How many prices per item?	Up to three — wash, iron, dry-clean
Who can manage it?	Your manager with the laundry permissions
What if we don't add cloth types?	The order form stays exactly as it is today
Can staff still overwrite a price?	No — for listed items, the system price is used automatically
