

MRK HOTELS

Review Batch — Problems & Solutions

v1.1.0 · Edition 1.0 · 15 August 2026

MRK Hotels — Review Batch · Problems & Solutions

Scope: 5-item review batch · **Status:** All Resolved — **5 September 2026**

1. Overview

This batch addressed five issues raised during review, spanning the Food & Beverage, Housekeeping and Laundry modules. Each problem and its solution is documented as a separate PDF in this package:

#	Document	Problem	Solution
01	Kitchen Ready Notification	Waiter isn't told when food is ready	Typed notification to the order's waiter + auto-ready READY/SERVED pill on the order-taker dashboard
02	Housekeeping Sidebar	Housekeeping staff saw irrelevant, badly grouped navigation	Dedicated role branch: Dashboard → Housekeeping → Laundry → Issue Reports → Communication (Messages + Room Status)
03	Housekeeping Task Export	Excel/CSV export was flat-key-mangled and misaligned	Rows flattened with explicit export-ready fields + declared <code>:columns</code>
04	Laundry Cloth-Type Registry	Free-typed items, hand-entered prices, no price list	Registry (table/model/controller/routes) whose service prices lock order pricing server-side
05	Laundry Settlement & Room Billing	Charges could land on vacant rooms; no deliberate settle flow	Occupied-room-only billing (422 otherwise) + settlement modal (Mark paid / Post to room)

2. Verification (all documents)

- Backend full suite: **569 passed / 2305 assertions** — includes the new `ClothTypeTest`, the extended `LaundryOrderTest`, the added ready-notification test, and the migration-phase policy test.
- Frontend: `vite build` **clean**; Vitest **107/107 passed**.
- Translations: every new key added to **both** `en.json` (fallback) and `sw.json`; key parity verified.

3. Deliberately Held for Review

Nothing in this batch has been **committed or pushed** — both repositories remain at the latest working state so the changes can be reviewed before landing.

Repo	Path
Backend API	mrk-hotels-api
Web frontend	mrk-hotels-frontend
