MANAGEMENT PANEL CHANGES GUIDE

For Non-Technical Staff

This guide answers every request in the client document **“MANAGEMENT PANEL DESIGN TO BE RESOLED”**. For each request you will see the **Problem** (written exactly as in the client PDF), the **Solution** delivered, the **Status**, and **Where** to find it in the system. All changes are visible to **ADMIN | MANAGER | ACCOUNTANT** and the rest of management.

1. TOP PANEL — PROFILE IN THE TOP RIGHT CORNER

“The list above should be moved into the profile at TOP RIGHT CORNER which will have a circle profile with user’s PROFILE PICTURE if not let it be initials of their registered names. For this case the name of the user is VICTOR ZACHARIA – therefore the initials on the profile should just be VZ with ROLE TITLE. Therefore on the TOP RIGHT CORNER there will be a circle profile of the user when the user clicks the profile it shall show links to PORTAL, USER MANUAL, MY PROFILE, LOG OUT, EN/SW.” — and — “DASHBOARD – should be removed completely.”

The top contact/identity strip is gone. A single circle profile now sits in the top-right corner showing the user’s initials (for example **VZ**) with the role title. Clicking it opens a short menu: **PORTAL, USER MANUAL, MY PROFILE, LOG OUT** and the language switch (**EN / SW**). The **DASHBOARD** item has been removed from this menu.

Status: DONE

→ **Dashboard > Top Bar (Right Side) > Circle Profile (Initials + Role)**

2. SIDE BAR — FRONT DESK NO LONGER OPENS BY ITSELF

“When manager clicks the side bar menu the FRONT DESK dropdown is automatically down showing all links pages about front desk which is wrong it should be clicked in order to show its dropdown menu.”

All management menus now start **closed**. FRONT DESK (and every other dropdown) only opens when you **click** it. Moving between pages no longer forces a menu open.

Status: DONE

→ **Left Sidebar > Menus Collapsed > Click To Expand**

3. WHAT MANAGEMENT SEES WHEN THEY OPEN THE SIDE BAR

“WHAT should management see when they click side bar menu: DASHBOARD, FRONTDESK, RESTAURANT & BAR, INVENTORY & PROCUREMENT, COMMUNICATIONS, BACK OFFICE.”

The management side bar now carries exactly these six entries, in this order: **DASHBOARD, FRONT DESK, RESTAURANT & BAR, INVENTORY & PROCUREMENT, COMMUNICATIONS, BACK OFFICE**.

Status: DONE

→ **Left Sidebar > Management Menu**

4. CREATION OF BACK OFFICE

“The circled pages should be transferred to BACK OFFICE. BACK OFFICE is the equivalent of SWITCH TO BACK on EZEE ABSOLUTE … it’s not just a dropdown that would have all pages but entirely like a REPORTs BROWSER from front desk. BACK OFFICE serves as the engine for management to set prices | time line of 24 hrs GMT or local time zone, Printer Configurations | HOTEL INFO such as name, logo, business motto, mode of payments settings, registering of LIPA NO and Bank Acc should all be at the BACK OFFICE.”

A new **BACK OFFICE** section was created, together with a Back Office “browser” page that gathers the settings in one place — just like the Report Browser. It links to: **Hotel Information** (name, logo, motto, time zone, payment modes, LIPA number, bank accounts), **Rates & Prices**, **Printer Configuration**, **Receipt & Tax Settings**, **Departments**, **Categories**, **Suppliers**, **Staff**, **Trusted Devices** and **Import**.

Status: DONE

→ Left Sidebar > BACK OFFICE (opens the Back Office browser page)

5. MESSAGES & COMMUNICATION & REQUISITIONS

“Since management panel has access to all departments then each department has messages & communication & requisitions there on the manager panel just keep one communication tab & requisitions tab (that has the summary of requisitions from all departments) and remove the rest from the management panel.”

Management now has a **single COMMUNICATION tab** holding Messages and Statuses, plus a single **REQUISITIONS** tab that summarises requisitions from every department. The repeated message and requisition links that used to appear under other menus were removed.

Status: DONE

→ Left Sidebar > COMMUNICATIONS > Messages / Statuses / Requisitions

6. INVENTORY & PROCUREMENT — CLEAN-UP

> *“Remove the page BACK OFFICE found where INVENTORY & PROCUREMENT dropdown is selected. DEPARTMENTS & CATEGORIES should be sent to BACK OFFICE. Remove the page called ACCOUNTING should only be visible at ACCOUNTANT PANEL. SUPPLIER should remain.”*

The old **Back Office** (store settings) page was removed from this dropdown. **Departments** and **Categories** were moved to the BACK OFFICE section. **ACCOUNTING** is now only visible on the Accountant panel. **Suppliers** remains in Inventory & Procurement.

Status: DONE

→ Left Sidebar > INVENTORY & PROCUREMENT (Suppliers kept) | Departments & Categories now under BACK OFFICE

7. RESTAURANT & BAR — SAME AS CASHIER, PLUS VOID

> *“MANAGEMENT should have the same user experience as the cashier of restaurant and bar but with more access and authority such as to void order. Therefore the way bar tender and cashier see their pages should be similar to what management sees therefore should look similar, ALL PAGES VISIBLE BELOW should as well be on MANAGEMENT PANELS.”*

The management **RESTAURANT & BAR** menu mirrors the cashier / bartender pages (Ordering, Manager, Inventory and Printer). It now also includes the **Order Summary**, where management can **VOID an order** — an authority kept to management (and the cashier/bartender counter roles) so the day’s numbers stay protected.

Status: DONE

→ Left Sidebar > RESTAURANT & BAR > Manager > Order Summary (Void Order)
